

# Exercise Briefing: Inference

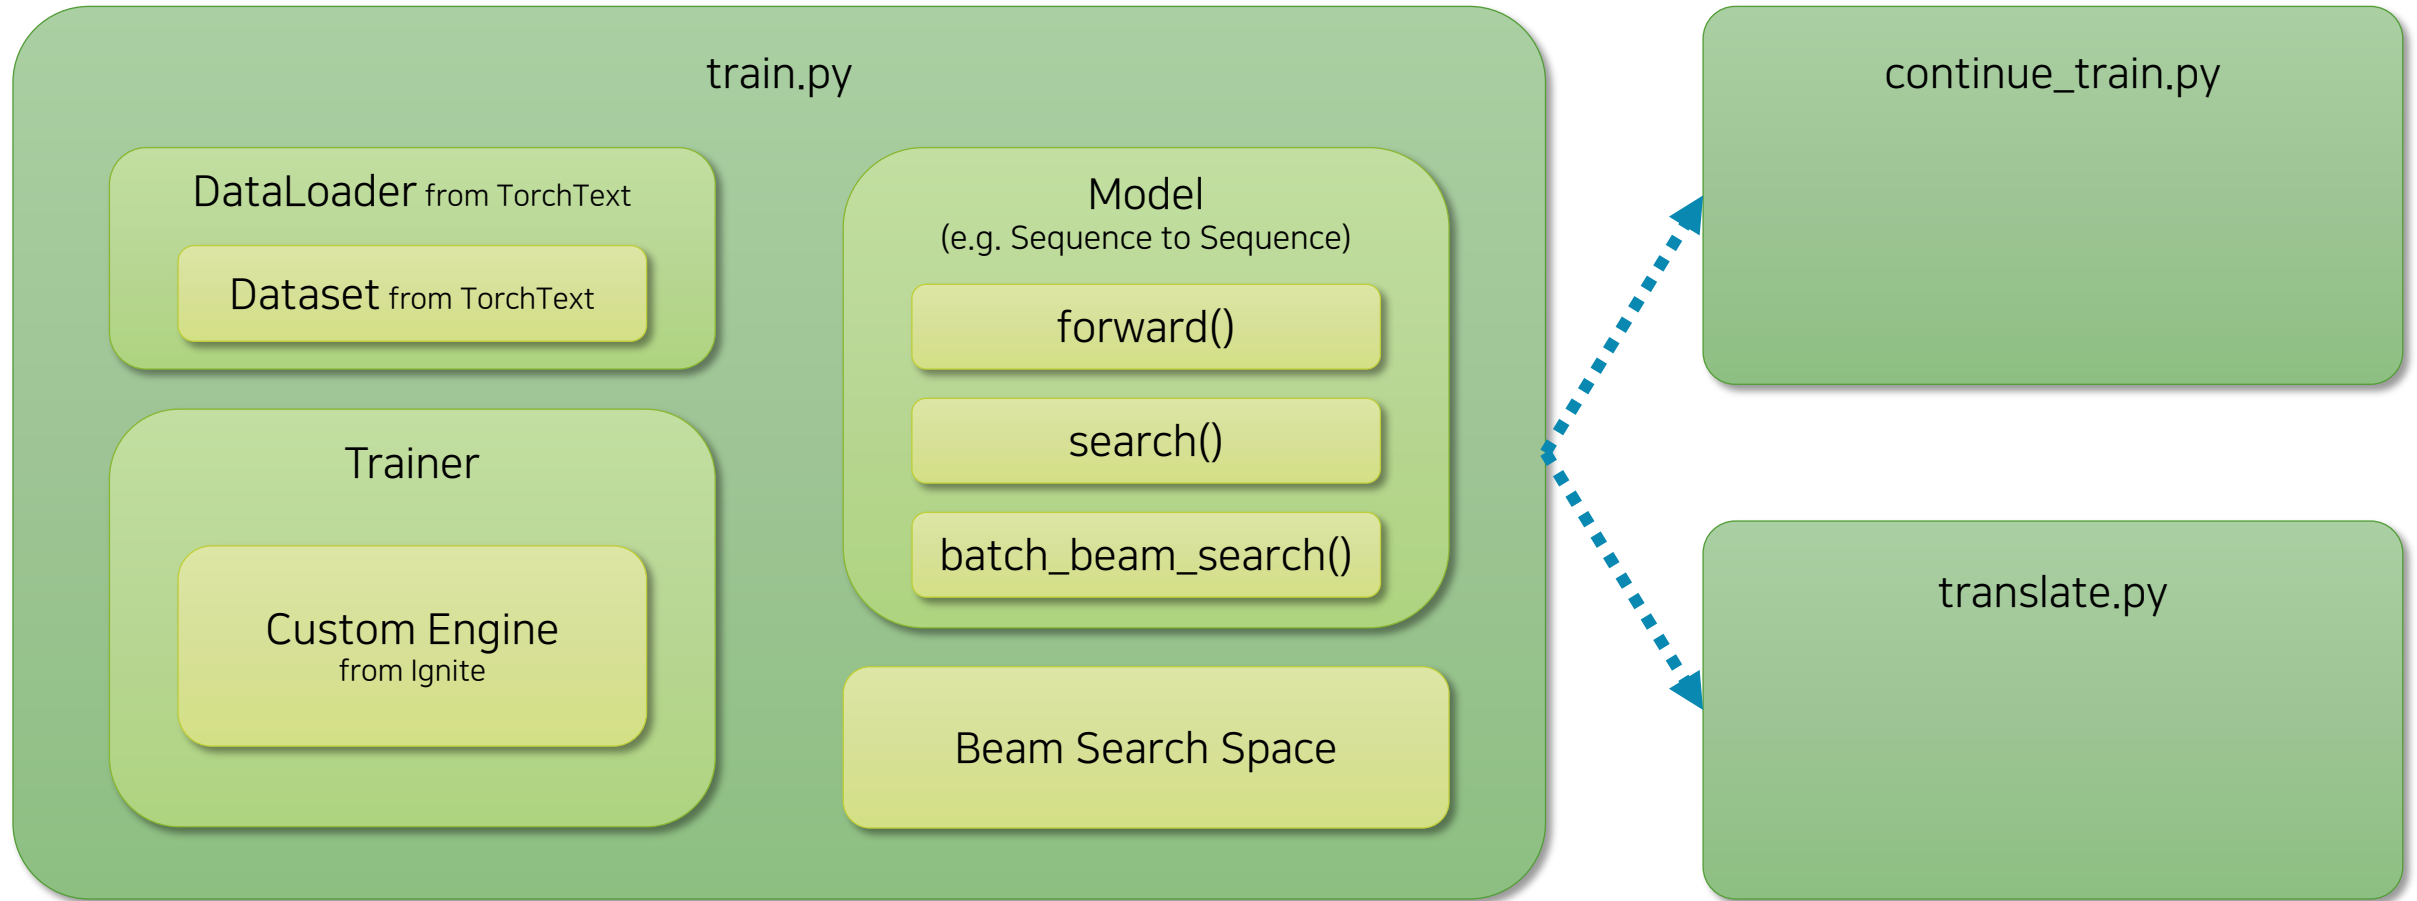

Ki Hyun Kim

[nlp.with.deep.learning@gmail.com](mailto:nlp.with.deep.learning@gmail.com)

# Training vs Inference

# Project Implementation

# What we need

- To resume the training: `continue_train.py`
  - Training configuration
  - Weight parameter of model and optimizer
  - Training(+ valid) corpus with same vocabulary
- To take inference: `translate.py`
  - Training configuration
  - Vocabulary from training corpus: word to index map
  - Model weight parameters
